

Improve student engagement with interactive flat panel displays

Does the following scenario sound familiar?

A professor works hard to create lively content for an upcoming lecture, but is delayed by technical difficulties when using technology in the classroom. Students quickly lose interest, and the professor struggles to engage them in the subject matter for the remainder of class.

Enhance the way faculty members use technology in the classroom

Ricoh's interactive flat panel displays (IFPDs) can help to reduce time spent prepping for classes and improve student engagement. With fast access to applications needed for classroom presentations, professors can start lectures as soon as class begins. Plus, Ricoh IFPDs provide access to Reactiv Suite presentation solutions that offer more interactive learning opportunities.

With Reactiv STAGE, professors can seamlessly toggle between various file types — such as videos, images, web pages and Microsoft® programs — saving prep time by eliminating the need to consolidate all content into a single presentation program. Plus, it's easy to:

- Arrange multiple visual elements on the IFPD for in-class comparisons.
- Annotate documents directly on the display.
- Save the annotated files for easy post-class follow-ups with students.

Reactiv SCRIBBLE empowers both professors and students to collaborate directly on the IFPD by making annotations and taking notes. After class, professors can share these collaboration files with students digitally. Exiting the Reactiv Suite to access other solutions or visit websites is quick and easy with the IFPD's Windows® 10 controller.

In larger classrooms, instructors can duplicate what appears on the display by connecting a Ricoh projector — providing students in back rows with a clearer view of the content. Or, they can use the projector to show additional content that complements what's displayed on the IFPD.

Improve student engagement with interactive flat panel displays

Increase faculty productivity and improve student engagement in the classroom with:

- Less prep time
- Intuitive collaboration technology
- The ability to reduce delays due to technical issues
- Easy navigation between files
- Dynamic annotation capabilities
- Instant file sharing

Hardware and solutions

- Ricoh IFPDs (available in sizes 32", 55", 65", 75" and 86") with Windows® 10 controller
- Ricoh projectors
- Reactiv Suite interactive presentation software — including Reactiv STAGE and Reactiv SCRIBBLE
